

SCHOOL OF YOUNG LEADERS

July 24, 2014

THEMATIC TRAINING ON PROJECT MANAGEMENT

“RUSSIAN WORLD SCALE PROJECTS”

PROGRAM**10.00-10.45****The largest projects of the Soviet Union**

The industrial development of Russia has always depended directly on its geographical position and range. The remoteness of mineral deposits has determined the necessity of the construction of pipe and transport lines unique in their length and scope. Man's strive for knowledge and the fast development of science in the middle of the 20th century gave the push for the creation of the first gates to space.

10.55-11.40**Russia today and the future outlook**

In the 21st century Russia is on the verge of new projects. Today Russia is the main supplier of carbohydrates for many European countries, and this puts certain responsibilities on us. In particular, the "South Stream" gas pipeline is being built for the provision of energy safety. A new launch pad for space systems is being planned and designed, with it – a full infrastructure. Today, all these projects are being created in close partnership with our international partners.

11.55-13.00**Case study (Work-out for the mind)**

Several interesting logical problems, to train skills in risk management and prospects assessment, to improve leadership.

ABOUT CPMRI

The Corporate and Project Management Research Institute (CPMRI) was established in 2013 with the aim of improving corporate and project management efficiency in Russia.

The main goal of the Institute is the creation of a national school and corporate and project management practices through the consolidation of unique Soviet experience and its integration with the best international practices and adaptation to modern requirements and realities.

Fields of concern:

- corporate management
- project management
- program monitoring
- risk management
- efficiency assessment

The employees and experts of CPMRI have participated in various large-scale projects in the automation of fuel and energy enterprises on the side of the customer, as well as in the processing industry, in the building of large projects for companies such as Gazprom, Sberbank, Rosneft etc.

ABOUT CPMRI

Moreover, our specialists have worked with several regional administrations in project realization (the Yamalo-Nenets Autonomous District, Astrakhan). They have also been the invited experts of investment programs. The board of experts of CPMRI includes specialists who worked on projects in Salekhard, Urengoy, Moscow and Saint Petersburg.

In the course of providing commercial services the Institute also uses its own developed practices in general management, large-scale project and program management, including topical and other areas. The main direction of commercial services is the organization of work both on projects and in companies which conduct active investment and project activity.
